

ThumbDock®

The ThumbDock®, available through ISI, is a patented positioning device for supporting the thumb in position for volar surgery. Especially useful for:

- A1 Pulley Release
- FPL Repair
- Digital Nerve & Artery Repair
- Volar Mass Excision
- Trauma requiring Volar approach to the thumb

Frees the surgeon's and assistant's hands to use instruments, hold retractors, and reach for instruments. A simple solution for an awkward positioning problem.

The ThumbDock® is made of durable stainless steel and is easy to use and clean. Velcro straps hold hand and digits securely in place. Available in left or right or as a set of two.
